Rob,
Your plan sounds great. Thanks very much for taking the initiative to put a plan out there. Your proposed schedule really helps in moving this forward, and I appreciate everyone's work on this.

Thanks,
Mikell

Hey -- After speaking with Joe this morning, here's an update. Jen has worked up some definition language for riparian. Joe is looking at that and also trying to run down the stuff Suiter has been working on. Assuming we can wrap up some kind of working definition ASAP, we can turn to modifying the left side of the CSM. I propose that Jen and I take a crack at this with the aim of completeing a working verison later

today. As for filling in the pathways inidicators, we're aiming for tomorrow morning. I've spoken with Chip this morning and he and Eric are planning on holding a TCT tomorrow that will potentially be abbreviated.

If that should be the case, I propose that the assignees stay on the line to work through this exercise. If my recollections are accurate, tomorrow afternoon is no good for Brent and Jen, so we'll need to do it in the morning.

Thanks,

-R
